CONSTANTINE PIRAGASH

Front End Developer

PROFILE

As a final year student at the University of Moratuwa, currently pursuing a degree in a non-IT field at the Faculty of Engineering. Passionate about technology and eager to transition into the IT field as a Front-End Developer. Although my academic background lies outside the IT field, I have independently developed a solid foundation in front-end development through self-study and personal projects. I have gained hands-on experience in building responsive and visually appealing web interfaces.

PROJECTS

Notepad application

- Used HTML, CSS and React JS for creating the user interface
- User can create a note, delete the existing note and also can update the existing note
